# **GOLDBECK Prefab Elements OHS POLICY**

**GOLDBECK  
SAFETY AT WORK**

*SAFE TOGETHER!*

The company **GOLDBECK Prefab Elements**, as a leading supplier of comprehensive building solutions, focuses on safety of its employees, contracting parties and all persons engaged in the implementation of projects. We create and maintain the required standards in the scope of Occupational Health and Safety (OHS) at all the stages of our activity: from designing through production, up to the deliveries of prefabricated elements and their assembly at the construction site. Our target is the creation of safe, healthy and ergonomic work environment, in which every employee is aware of his/her obligations and is responsible for own safety and for the safety of others.

**GOLDBECK Prefab Elements** - in order to fulfil the assumptions of this policy - undertakes to:

- **Protection of health and safety of employees**

The main purpose of the OHS Policy is to ensure safety and health of all employees and co-operators of the company GOLDBECK Prefab Elements who work at the offices, on the production areas, in logistics and at the construction sites.

- **Minimising the risk of occupational accidents and diseases**

Owing to identification of the potential threats and systematic analysis of occupational risk, we strive at minimisation of the number of occupational accidents and diseases.

- **Promoting the culture of safety** OHS culture in our company consists in involvement of all employees in actions aimed at the improvement of occupational health and safety. We apply the approach that gives each employee a possibility of reporting threats and suggesting improvements.

- **Ensuring high standards of trainings and education**

All employees are obliged to participate in cyclic trainings in the scope of occupational health and safety, adjusted to the specific character of their work, owing to which we can be certain that our employees are well prepared to coping with the situations of threat.

The company **GOLDBECK Prefab Elements** treats the health and safety of its employees as the highest priority. Through the adequate trainings, investment in technologies, observing the standards of OHS and through the promotion of the culture of responsibility for safety, we strive at creation of safe and comfortable work environment. Every employee is responsible for his/her safety and also for the safety of others, which contributes to success and development of our company.
